

Release Management → App Releases → Production Track → Manage → "You have a release that hasn't been rolled out" → Edit Release → Review → Review Summary → Errors → View error messages →

→ "2 Messages for release" →

→ Error "You need to upload an APK or Android Bundle for this application"

→ Error "You cannot remove all production APKs and Android Bundles" →

→ Severe Warnings → View Warning Messages

→ 1 message for APK1

→ Device Support Removed

→ Warning

"Deactivation of this APK will result in your app being available for new installs on fewer types of devices"

Tip: If this is an unintended change, then retain this APK in the new release or ensure that your new APKs support all currently supported devices"

**How do I correct these errors and send my APK for review?**
