

Attachment : Last aia

New request :

If last answer is : **[7,8,9,13,14,20,21,22,25,26,32,33]**

how to convert the last answer list into a hex list according to the following python procedure.

```
sensors = [7,8,9,13,14,20,21,22,25,26,32,33]
command = [0x4, 0, 0, 0, 0, 0, 0]
for n in sensors:
    n = n - 1
    nbyte = int(n / 8)
    nbit = n % 8
    command[nbyte+1] = command[nbyte+1] | (1<<nbit)
for b in command:
    print (hex(b), end=' ')
```

Run python answer : 0x4 0xc0 0x31 0x38 0x83 0x1 0x0

The answer I needed in AI2 is a list. It should be as following list.

[0x4, 0xc0, 0x31, 0x38, 0x83, 0x1, 0x0]

Could you help me to rebuild a new.aia continued with last aia ?

Sorry,I'm not familiar with AI2. But I have to finish this AI2 program in soon.

Best regards,

Tommy
